***NASA LEARN and NES Offering Webinars:** NASA Learning Environments and Research Network, or LEARN, and NASA Explorer Schools have teamed up to offer exciting webinars featuring NASA educational resources for educators. Below are four offerings in April 2011 and the first May 2011 event. The webinars are presented from 9-10 p.m. EST to ensure educators on both the East Coast and West Coast can participate. And, don't worry about the technology. We have tech support ready to walk you through viewing and participating in the webinars.*

The Virtual Lab -- May 25, 2011, 6:30-8 p.m. EDT This Web seminar focuses on using a free, downloadable computer program that simulates a scanning electron microscope. Selected specimens from life sciences, physical sciences, and Earth and space sciences related to current NASA research will be featured. With this virtual tool, your students have access to high-powered simulated scientific instrumentation with 90 different specimens and three different virtual tools: atomic force microscope, scanning electron microscope and fluorescence light microscope.
